Welcome to the Trac Open Source Project

Trac is an enhanced wiki and issue tracking system for software development and web-based software project management. Our mission is to help developers manage their projects. Trac should impose as little as possible on a team's established development process.

Update

Milestone: 제품 백로그:시나리오

9 months late (08/31/2010)

Number of tickets: closed: 0 active: 56 Total: 56

AraDefinition 에서 정의된 **아라** 를 달성하기 위해, 사용자들이 **아라** 를 사용하여 할 수 있는 일들을 모은 백로그입니다. 본 백로그에 있는 사안들이 실제로 일어날 수 있도록 하기 위한 **기능** 에 대한 백로그는 제품 백로그:기능 마일스톤에 정리되어 있습니다.

Milestone: 2010.12.사용자 리포트

No date set

Number of tickets: closed: 10 active: 7 Total: 17

2010년 12월중 아라라 엔진에서 발견된 이런 저런 버그들은 일단 이 마일스톤으로 모읍니다.

Milestone (Arara)

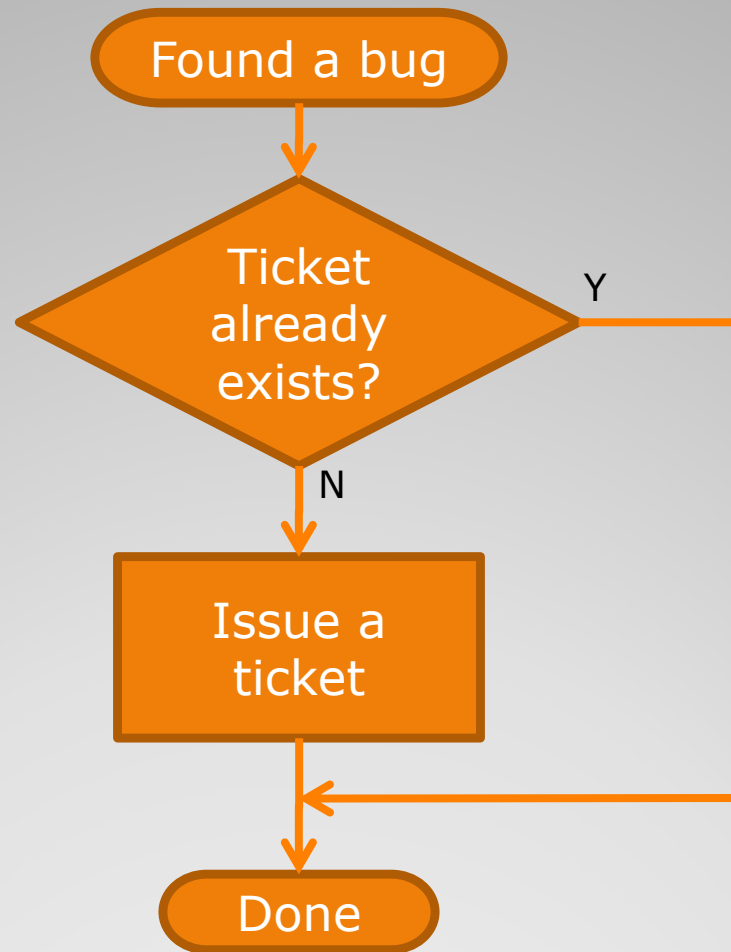

- Documentation is extremely important
- Get familiar with wiki grammar
- Feel free to write on wiki
 - If you did something wrong, just UNDO!

Wiki

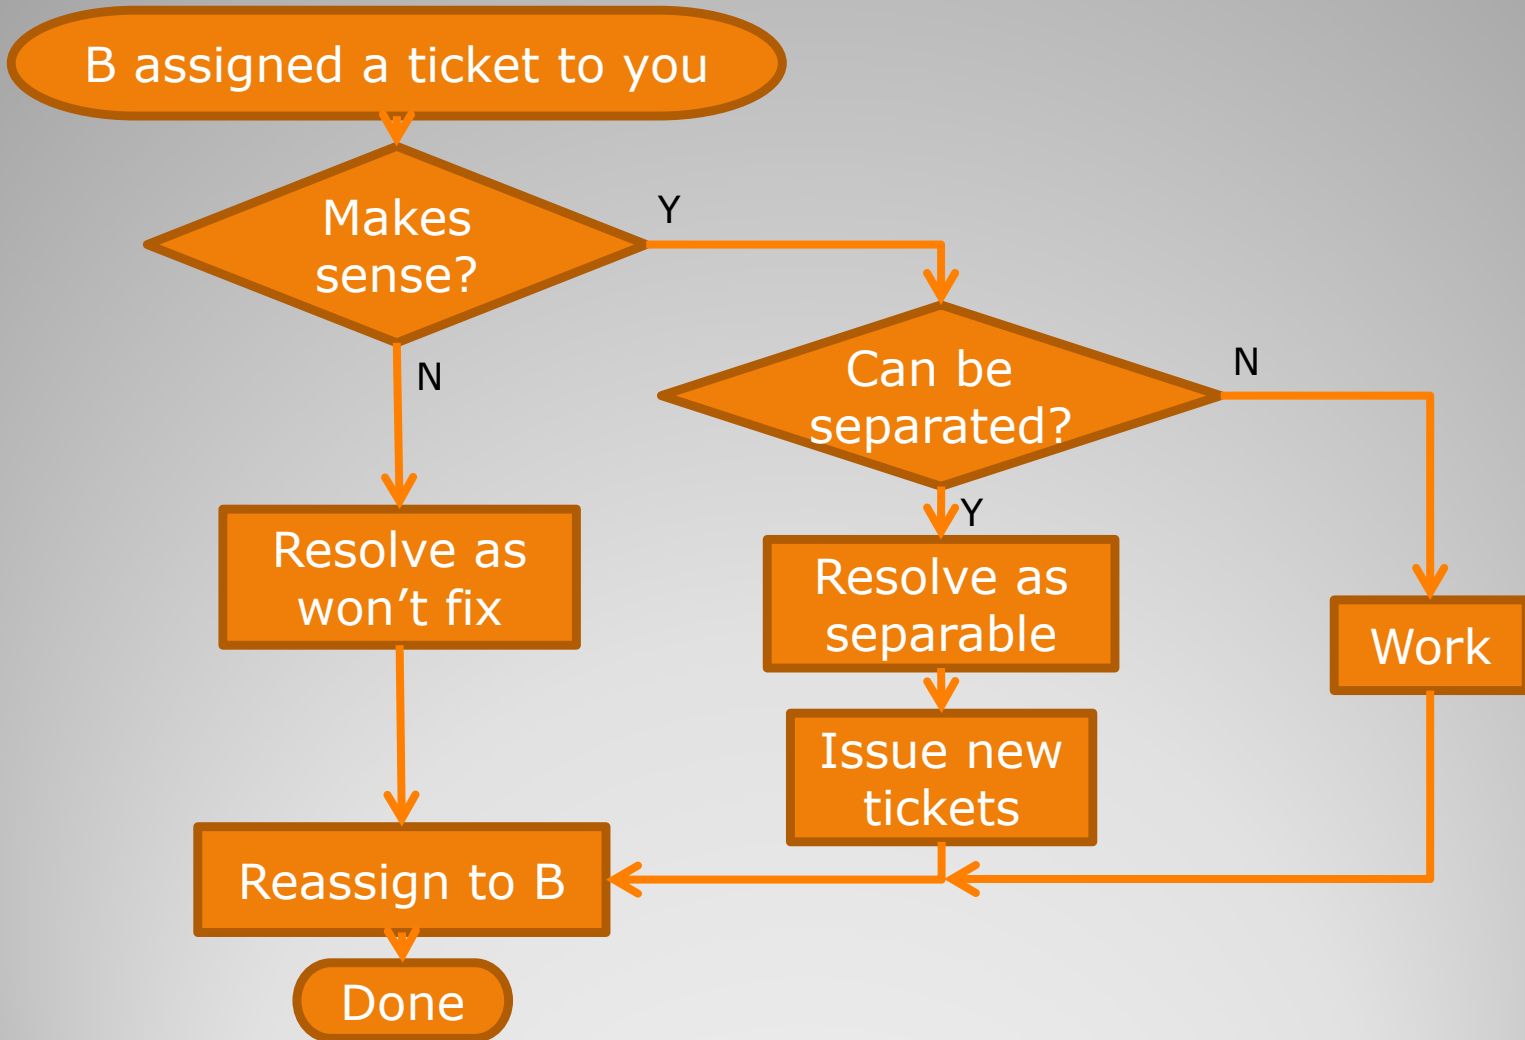

- Project roadmap
- Developers
- Setting up development environment
- Program code explanation
- Features of the program (Backlog)
- History of the project

- ALL ABOUT THE PROJECT

What's on wiki?

Found a bug?

Assigned a ticket?

- A code segment may be harmful
 - Violating coding conventions
 - Bad coding habits
 - Duplicate codes
 - Ambiguous naming
 - ...
- Codes need to be **reviewed** before reflection

Code review

- Strong
 - Reflected codes are always `good`
 - Newbies can learn from the trained advisors
- Weak
 - Slows the project
 - Committers become timid
 - If reviewers are busy...

Code review

[Add comment](#)

arara/model.py (Diff revision 1)

```
148     def __init__(self, board_name,  
board_description, order, category,  
type = None):
```

```
148     def __init__(self, board_name,  
board_description, order, category_id  
= None, type = None):
```

Board 객체를 생성할 때 category 정보가 필요한가 본데 category가 객체로 관리 된다면 객체를 통채로 넘겨서, id 정보가 필요하면 __init__ 함수 안에서 객체의 id를 얻는게 더 자연스러워 보입니다.

혹시 이렇게 구현할 수 밖에 없는 이유가 있나요?
